

Use-Case Flow Specification - Record Grant Expense

Use Case	Record Grant Expense
Related Requirement	FR-001
Primary Actor	Faculty Researcher

Preconditions

- The faculty researcher has an active research grant.
- Grant allocation details are available in the system.

Postconditions

- The approved expense is recorded against the selected grant.
- The remaining grant balance is recalculated and updated.

Main Success Scenario

1. Faculty Researcher selects the relevant research grant.
2. The researcher chooses to record a new equipment procurement expense.
3. The researcher enters the expense details and amount.
4. The system validates the entered expense information.
5. The system checks the expense against the available grant balance.
6. The system records the expense.
7. The system calculates the new remaining balance.
8. The updated balance is displayed to the researcher.

Alternate Flow - Expense Exceeds Grant Cap

9. The system detects that the entered expense exceeds the available grant limit.
10. The system prevents the expense from being recorded.
11. The system informs the researcher that the grant cap has been exceeded.
12. The expense can proceed only if an appropriate administrative override is provided.
